NSD Company

NSD is a software engineering company, it's editor of a wide range of software from a simple system, such as a retails (POS) management system to a huge system for huge business in both sectors, public and private.

To allow its clients to control and optimize their business process by taking advantage of the latest business practice rules included in NSD Systems, NSD offers to its client excellent products and all related services (design, development, implementation, and maintenance.... etc.).

Thus, through its major and complementary activities, Business Consulting and Software Edition and its strong background as well as highly qualified people, NSD serves and provides to its clients, best services and best systems.

NSD offers you a full cycle of service including

Software delivery and customization of the client's specific business rules, this development is based on clients 'requirements)

System Implementation where NSD implements its software which allows NSD clients excessive time and cost wasting.

NSD Training accompanies NSD System users (Power and End Users) during the full cycle of NSD system implementation and beyond.

Support and system optimization including business rules enhancement.

The name of NSD becomes, today, the same as for Excellence and high quality in every project we do, or any product we create, or we improve.

NSD is editor of Integrated Solutions and Services Provider

To be active and be involved in the increased efforts to economic growth, companies focus on the latest technology and the latest management rules allowing them to perform and optimize their business processes;

To compete and grow in a dynamic economy, computing tools and especially a preferment software like NSD Enterprise Resources Planning (NSD ERP system) becomes the key factor of success.

We offer to our clients, an excellent ERP system (NSD ERP) and we put at their disposal a dedicated highly qualified team, Developers, consultants and experts in business practice as well as the latest business rules and information technology.

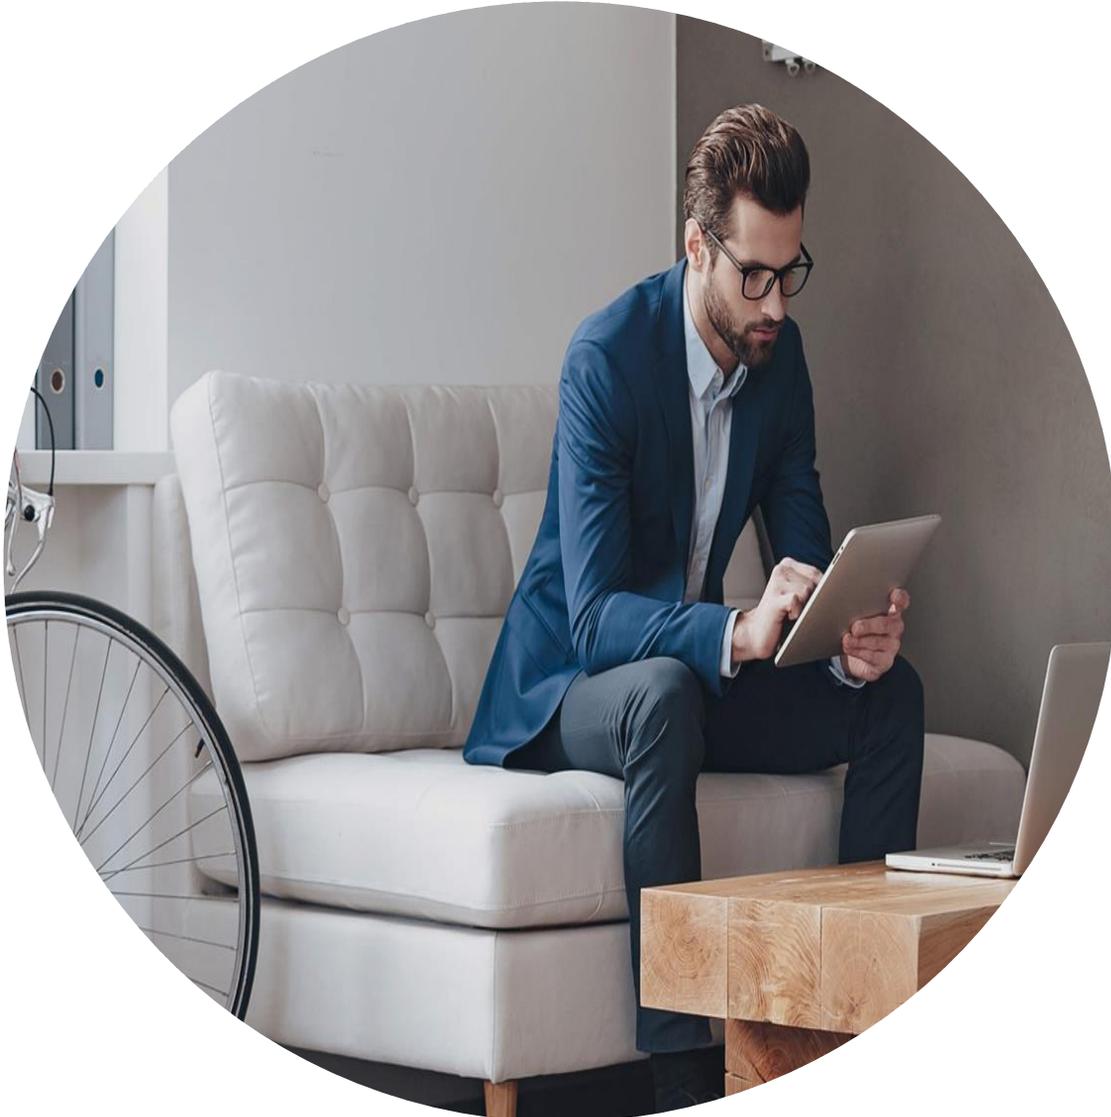

NSD and its clients are business partners

We want to help you to optimize your business process and maximize the value returned by your NSD ERP solution;

Thus, deeply concerned by the total success of the implementation of its products, NSD assumes and realize the implementation of its ERP System (NSD ERP) – We do not accord the implementation of NSD ERP to a third party, whoever it is.

Our Roles:

- ❑ Our role is not limited to the sales of our products or services, it goes beyond that, by advising and support our clients to improve and enhance their business process based on best business practice;
- ❑ Our culture and our professional ethic mean that, we respect our clients' specificity, and confidentiality, we must be close to our customers, wherever they are;
- ❑ Our technical support starts from the moment where our collaboration starts.
- ❑ Our mutual success is based on a close collaboration with the client project team.

Profile of our People

The members of our teams, wherever they are, are all professionals experienced in organizational infrastructure development and management as well as control of business procedures.

Team Members are locally based with extensive local and regional work experience. We are therefore uniquely positioned to look at fundamental business issues and clearly understand your requirements.

Members of our team also have extensive business and information technology expertise and hence can understand the commercial issues that are important to you.

We leverage our relationship network especially in the Business and Information Technology Communities, in the Middle East, Africa and beyond.

We believe that Change Enablement is a critical success factor of any large project. As our framework below depicts, we believe any change initiative involves a transition at both the organization-wide and individual (i.e., Employees) levels. To make the transitions as smooth and lasting as possible, we will incorporate the following Best Practices into our project approach.

Main performed tasks to ensure close collaboration and knowledge transfer:

- Balanced transfer of technology, process, and change enablement knowledge.**
- Process and system training.**
- Shared ownership of all project tasks and deliverables.**

Our Services

Conscious of the increased drive towards economic growth and development within the Middle East and the increasing focus by companies within the region on efficient, timely and performance focused business organization structures, a dedicated team of IT, technology application, ERP and NSD specialists have been assembled to provide seamless technology solutions to our clients across the region. Our NSD services draw on international best practices and our experiences; services also significantly involve full training and implementation support in addition to process, systems and operations expertise.

- Education**
- Government.....**
- Contracting**
- Oil and Gas**
- Manufacturing**
- Army**
- Real estate**
- Services.....**

Our Partnering Approach

Procuring an application allowing the management of your business it seems easy !

However, running, optimize and manage your global business with its small details, is another history Procuring a new software can be decided based on the price of the software! And then its support and enhancement are also other histories.

NSD pledges to present to its clients the best system, best price, and best services

Installing a new software doesn't come without some difficulties. Significant up-front organizational changes, as well as large software and maintenance costs, are just a few of the pitfalls.

This is where NSD excels in reducing to a minimum these pitfalls.

Finally, NSD System eliminates costly duplication and streamline external business processes and by its, friendly, user interface and full flexibility and customizability, the NSD system, accompanies you during the change of your organization structure and parameters.

We, at NSD by comparison to other companies, consider our customers as partners in that we stay with them even after post-production to enhance or to resolve any uprising issues.

NSD Systems are, all of them, fully customizable and have important flexibility allowing NSD clients, whatever their activity, to implement easily their business rules and optimize them.

In addition to its deep knowledge in business consulting, NSD has a wide range of products which are:
